DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19, 20 and 22 are rejected under 35 U.S.C. § 112, first paragraph, as based on a disclosure which is not enabling. Recitation of means or circuitry corresponding to tail current source N22 of Figs. 4 or 6 is deemed critical or essential to the practice of the invention, but is not included in the claim(s). An arrangement lacking this feature is not enabled by the disclosure since it cannot be understood from the specification how the circuit will operate without such. *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Examiner has considered Applicant's remarks and the amendment to the claims, however, such is not seen to overcome the rejection. Since there is no connection seen therebetween, it is considered inappropriate to recite element N22 being part of the same element (the operation current supply) as "current mirror" P7, P8. Examiner further comments that it is understood that the power aspect of element N22 is critical to the invention. Further, it would not appear that the circuit would operate as a differential amplifier if N22 were missing, (i.e., the sources of N3 and N4 were connected to ground).

To overcome the above rejection, it is suggested that the claims recite a --differential pair-- having the claimed "first insulated gate transistor" and the "second insulated gate transistor".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2816

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 19, 20 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 19, it is not understood how the circuit can provide the recited operation without the above discussed circuitry.

Claims 20 and 22 are rejected for the reasons discussed above with claim 19.

Examiner has considered Applicant's remarks for the above rejection and has not found them to be persuasive for the reasons discussed above.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19, 20 and 22 are rejected under 35 U.S.C. §102(b) as being anticipated by newly cited reference to Bion et al. (USPN 5,862,091). Bion discloses, in Fig. 12, a circuit comprising: “a first insulated gate transistor (M4)”; “a second insulated gate transistor (M5)”; an “operation current supply (39 and 40)”; and “a buffer circuit (44)”, all connected and operating similarly as recited by Applicant. Reference is made to Col. 8, lines 45-56 and claim 8 of Bion et al. which discloses that 39 and 40 are different sizes.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
